TECHNICAL SPECIFICATIONS

MODEL	SUPPLY	WATT		FLOW CAPACITY		SPECIFICATION	N.W./G.W. (kg)	PACKING (LxWxH)mm
		HOT	COLD	HOT	COLD			
AqIn 15	220V~/50Hz	420W	150W	5L/h ≥90°C	3L/h ≤10°C	Compressor cooling	12.6/14.3	365x355x1098

TROUBLESHOOTING

Please check the following before having the machine repaired.

PROBLEM	POSSIBLE CAUSES	SOLUTION
No hot or cold water	1. Overconsumption of hot or cold water in a short period of time. 2. No power supply	1. Just wait a moment, and then hot water or cold water will be available again. 2. Connect plug to socket, turn on heating or cooling switch.
No water running out from pipe	1. Empty bottle. 2. Inlet of bottle support is blocked by bottle seal.	1. Replace with another bottle. 2. Remove bottle seal and install bottle again.
Leakage from bottle support	Broken bottle	Replace with new bottle
Noisy operation	Unstable installation	Place the machine on a flat and solid surface

PART NAMES

(FRONT)

(REAR)

NO.	PART NAME	NO.	PART NAME
1	Bottle Supporter	7	Cooling Switch
2	Top Cover	8	Heating Switch
3	Indicator Light	9	Power Cord
4	Cold Water Tap	10	Drain Hole
5	Hot Water Tap	11	Condenser
6	Water Collector		

NOTES:

This machine is suitable for 3 or 5 gallons bottles. Do not use tap or hard water. This machine should work under environmental temperatures between 10°C to 38°C, with relative humidity not higher than 90%.

Ice Block: please clear the ice block first.

If this machine works under environmental temperatures below 0°C or the thermostat does not work, the water will freeze in the cold-water tank and block the pipe.

FUNCTION INTRODUCTION

1. This dispenser satisfies the needs of making tea, coffee and cold drinks. It is suitable home and public use.
2. With the adoption of distinctive thermal isolation technology, this machine can minimize thermal exchange between hot & cold water.

OPERATION INSTRUCTIONS

1. Tear the label and open the water bottle.
2. Carefully, with two hands, insert the bottle into the bottle supporter on top of the machine. Do not plug the power cord or turn on the red switch until 3 minutes after you put the full water bottle.
3. Insert the plug into the socket, and then turn the power switch on. The indicator light lights up accordingly once the machine is working. The light will turn automatically off when the water reaches the rated temperature.
4. When the water bottle is empty, pull out the bottle with two hands; then replace it with a full bottle of water.
5. If you want to drink hot water, press the heating switch. If you want to drink cold water, press the cooling switch.

CAUTION

1. Keep this machine in a dry and cool place avoiding direct sun light. The back of the machine should be at least 8 inches from the wall. Never put the machine on paper or foam; this may cause unstable conditions as accumulated water or cause Electrical leakage. Never put anything flammable beside this machine.
2. To avoid damage to the machine, do not plug the power cord or turn on the heating switch (red) until at least 3 minutes after you place the full water bottle.
3. In case hot (or cold) water will not be needed for a long time, turn off the switch to save energy.
4. This water dispenser must be used with a three-prong grounding plug and Electrical leakage protection switch. If a two flat prongs plug is used, the grounding wire must be properly grounded before use.
5. In this machine is not going to be used for a long time, turn off the switch, pull the plug out from socket and drain the remaining water through drain hole.

6. Never use organic liquids to clean the machine. Do NOT splash water to the body of the machine.

7. You should always use the On/Off switch to turn on or off the machine. It is prohibited to turn on or off the machine by plugging or unplugging the power cord. Never extend the length of the power supply cord to avoid fires.

8. For this model dispenser (with compressor), never turn the machine upside down or tilt it more than 45°.

9. Since this model dispenser thermostat has been factory adjusted, please do not try to adjust it by yourself.

10. This machine should not be turned on until at least 3 minutes after plugging the power cord or after turning off the cooling switch (blue button).

11. The power cord or other parts must be replaced only by professional technicians when it is damaged.

12. We reserve the right to revise this instructions manual.

CLEANING

To avoid accidents, cut off the power supply before cleaning according to the following instructions.

1. The machine has been disinfected before shipping from the factory. Before using this machine for the first time, clean the machine by pressing the hot water tap and cold-water tap, and letting about 1 liter of water to flow out.
2. The machine should be disinfected with the disinfectant available from the local market according to the instructions of the disinfectant, and then cleaned with water.
3. Have the bottle supporter, water tank and heating element cleaned by a professional about every year. This will keep the machine in good condition and extend its life. Never disassemble this machine by yourself to avoid damaging the machine.
4. Draining instructions: open the taps and take away the cap and rubber stopper from the water outlet on the rear side of machine.
5. Use any neutral soft cloth to clean the surface of the machine.
